

Endless Pools, Inc.

A complete line of swimming machines

Original Endless Pool®

Endless Pool Swim Spa™

Fastlane Pool™

Fastlane®

WaterWell™

Fiberglass Endless Pool™

The inspiration for the Endless Pool came more than a half-century ago in Arizona, when my father swam in place in the irrigation canals that brought precious Colorado river water south to Phoenix. He and I talked for years about building a machine to swim at home—a machine that would simulate open-water swimming in a small space. Somehow other ideas, other machines filled our time.

I built the first Endless Pool on the pool deck at Columbia University in the summer of 1988. There was so much we didn't know at the time. The refinements in design that would allow us to ship our system all over the world came later. What I remember most with that first rough prototype was the wonder and amazement of swimmers who realized that you really can swim in place. The benefits for coaches and swimmers able to gain immediate feedback from a bottom mirror were clear even then. The therapeutic benefits of the pool were also obvious. My first customer explained to me the benefits of water-based exercises for people with MS. His neighbor purchased our 4th pool for her rheumatoid arthritis.

More than ten thousand Endless Pools later, the therapeutic benefits of swimming enjoyed by our customers are still clear. What has also become clear are the many challenges facing our customers interested in installing a pool. In response, we have developed a complete line catering to our clients different needs and budgets. Ease of installation as well as aesthetic choice led us to the innovative use of acrylics and fiberglass to augment our original design. For those interested in water therapy and exercise, we developed the WaterWell™ without a swim current. In the following pages, we present these different alternatives each developed over the years to help you realize my father's dream: exercising at home in a compact, personal pool heated to the temperature you select. Flexible enough to fit just about anywhere, any one of our Endless Pools will provide you with many years of health and fitness.

Original Endless Pool® pg 3
With more than ten thousand in operation worldwide our signature pool offers unrivaled design and installation flexibility and the highest quality swim current available.

Sincerely,
James

James Murdock
President
Endless Pools, Inc.

call us at **1-800-732-8660**.

Endless Pool Swim Spa™ pg 5
Combining the luxury of an acrylic spa and the variable speed current of an Endless Pool, our Swim Spa installs easily on any sound level surface—backyard living at its finest.

Fastlane Pool™ pg 9
Simple, inexpensive, perfect for the kids, our Fastlane Pool is the ideal training pool to set up out back.

Endless Pools, Inc.

Located along the scenic banks of the Chester Creek in Aston, PA, Endless Pools showroom, research center and sales offices provide a convenient location to try any one of our products. Our state-of-the-art factory, located just up the road, manufactures and ships all of our products throughout the world.

Fastlane® pg 11
 Bringing our patented, high quality, variable-speed swim current to the backyard pool, the Fastlane transforms pools too short for a good swim. Wall Mount and Deck Mount models are available for new construction and retrofits.

WaterWell™ pg 12
 Ideal for aquatic exercise and therapy, our WaterWell provides chest-deep water in a freestanding package that fits just about anywhere.

Fiberglass Endless Pool™ pg 13
 Our compact, single-shell pool with our variable-speed swim current is available in three different water depths ideal for swimming, aquatic exercise, therapy or just plain fun.

THE ORIGINAL ENDLESS POOL®

IDEAL POOL®.be

Our signature product, the Original Endless Pool is designed to fit just about anywhere, indoors or outside. Because of its modular design, it can be installed indoors in existing spaces. All of the components of an Original Endless Pool fit easily through doorways and down stairs. The modular design also allows for pools of varying sizes from 7' x 12' to 10' x 16' with water depths up to 6' deep. This flexibility has allowed more than 10,000 customers to realize the dream of swimming at home in an Original Endless Pool.

With an Original Endless Pool, you determine the aesthetic. Custom copings and sidings supplement the standard options that we offer. Because we use a heavy gauge vinyl liner inside the steel wall panels, you are not constrained by a mold. If you want multiple and specific water depths, we can accommodate. You can make an Original Endless Pool exactly the size you want. Dual propulsion pools are available to accommodate two swimmers at once.

Specifications:

- construction: steel-panel, vinyl liner permitting variety of sizes
- depths up to 6'
- wall height: 42"
- interior pool surface: 3 colors, 4 patterns
- manual and automatic retractable security cover, 5 colors
- synthetic coping, 5 colors
- aluminum coping with unlimited 6" tile choice
- interior return channels and propulsion system, stainless steel or acrylic
- skirting
- Water Quality System (220 volt, 30 amp GFCI)
 - Skimmer
 - Electric heater/controller
 - Cartridge type filter
 - Nature2 copper/silver ionization system
- underwater lights
- hydrotherapy jets
- full-depth stairs, corner steps
- front and floor swim mirror

ENDLESS POOL SWIM SPA™

Combining the supple curves and lustrous finish of an acrylic spa with the highest quality swim current of an Endless Pool, the Endless Pool Swim Spa provides the perfect antidote to the stress of everyday life – a place where you can luxuriate in a sculpted spa seat or swim for fitness and improve your health.

Designed to fit virtually anywhere, the Endless Pool Swim Spa comes fully skirted in a handsome wood cabinet. Pre-plumbed, the unit can be installed quickly on any sound, level surface. While typically installed on a deck or patio, the Endless Pool Swim Spa can be installed indoors in a converted garage or with new construction on any surface capable of supporting the weight.

Enjoy backyard living at its finest with a pool and a spa all in one. Fits even the tightest spaces. Steps between the spa seats allow for easy access and are perfect if you wish to build a deck up around the spa to give it a built-in appearance. Push button controls for the jets and underwater lighting are within easy

reach of the seats. A remote control lets you turn the swim current on and off. With the push of a button, adjust the speed from a gentle breast stroke to a 1:08 hundred-yard swim pace challenging even competitive swimmers.

Caribbean

Sand

Specifications:

- 6'9" x 13'5" swimming area
- 7'10" x 15' footprint
- water capacity: 1,950 gallons
- water depth: 40"
- overall height: 48"
- two spa seats with 10 therapy jets
- underwater light
- acrylic shell backed with fiberglass
- foam insulation throughout
- 3/4" wood skirting
- Water Quality System (220 volt, 30 amp GFCI)
 - Skimmer
 - Electric heater/controller
 - Cartridge type filter
 - Nature2 copper/silver ionization sy
- 4.0 kw electric heater
- swim current generator 5 hp

Options:

- interior color choice: Caribbean or Sand
- synthetic skirting
- high performance 6 hp swim current generator
- 7" high-visibility LED swim pace display
- underwater stainless steel swim mirror
- 4" rigid insulating cover
- retractable security cover

YOUR ENDLESS POOL: SWIMMING AND SO MUCH MORE...

SWIMMING: THE PERFECT EXERCISE

Few fitness activities rival swimming for cardiovascular and musculoskeletal benefits. Swimming works more muscle groups—simultaneously—than almost any other form of exercise. So it's a super-efficient workout.

And swimming burns as many calories as other aerobic sports, without the associated dangers to muscles, bones, ligaments and joints due to stress and constant pounding. Swimming in an Endless Pool is an activity you can enjoy all year.

REHABILITATION & THERAPY

Water therapy speeds recovery. In a pool, injured people can exercise with a greater range of motion without hurting joints or re-injuring themselves. The workout itself gets blood moving faster through the injured area, so it heals faster. The water pressure keeps swelling to a minimum.

Water therapy in an Endless Pool is beneficial for people with chronic muscle or joint pain, arthritis, MS, fibromyalgia and patients with orthopedic dysfunction.

Many Endless Pool owners with hip or knee replacements have returned to health more rapidly in their in-home pools.

AQUATIC EXERCISE

You don't have to be a swimmer to benefit from an Endless Pool. Aquatic exercise is ideal for people of all ages, abilities and physical make-ups. If you like sports, you can practice the movements involved with that sport in the water. For example, runners can run, soccer players can kick, and tennis players can practice forehand and backhand strokes with water resistance—a great way to increase power!

“Swimming comes close to being the perfect exercise. It uses all of the muscle groups repetitively and rhythmically, building strength and endurance without wear and tear. Swimming exercises your heart, improves circulation and tones muscles.”

Dr. David Bachman, Los Angeles Times

REHABILITATION & THERAPY

...AND FUN

TRAINING

The Endless Pool is the #1 choice of personal pools for triathletes in training. Athletes can monitor their swim stroke in the optional underwater mirror, enabling them to correct and refine technique. The strong current provides the optimal environment when training for an open-water swim. And with an Endless Pool, busy triathletes and competitive swimmers enjoy the convenience of swimming at home, on their own schedules.

...AND FUN

Of course, the whole family can get in and swim in the Endless Pool. The kids will love swimming and playing in the current...even the family dog has been known to take a dip. The Endless Pool can help your family stay fit and have fun...together.

LOCATING YOUR ENDLESS POOL, THE POSSIBILITIES ARE ENDLESS...

The Endless Pool is freestanding, and can be installed indoors or outdoors; above ground, partially in-ground, or totally in-ground. Excavation is optional. All components fit easily through doorways and down stairs. In colder climates, the pool is typically installed in an existing ground floor room, or basement area. In warmer climates, the pool can also be located in a backyard or deck.

To enjoy your Endless Pool as quickly as possible, you may choose a relatively simple installation in your backyard, or even in your basement or garage. Two reasonably handy people with no prior installation experience can accomplish a simple assembly in as little as two days.

Our team of professional architects and designers can help you decide the best location for your pool. When you are ready, call 1-800-732-8660 and request our Free Planning Kit to help you get started.

HOW YOUR ENDLESS POOL WORKS

The heart of every Endless Pool Swimming Machine is a small but powerful underwater hydraulic motor that drives a 16" propeller located at the front of the pool inside a protective housing.

The propeller pushes up to 5,000 gallons of water per minute through two grills that straighten and smooth the water. The result is a river-like current that is totally adjustable in speed from a gentle flow to a racer's pace by simply turning a knob or by using our optional remote control.

The Endless Pool swim current is far superior to those produced by jetted spas. These spas pump only a few hundred gallons of water a minute through high-pressure nozzles. The current is turbulent and very narrow, even when three or more jets are used. In contrast, all Endless Pool products utilize our proprietary high-volume system that produces an ideal, broad, deep, non-turbulent swim current that is wider than your body and deeper than your stroke. Remarkably free of waves and bubbles, our current is ideal for swimming, exercising and physical therapy. It is far and away the best swim current in the industry. Call to try one near you.

FASTLANE POOL™

Designed originally with the budget conscious triathlete in mind, our Fastlane Pool is ideal for someone who simply wants a place to swim, with little interest in the time, effort, and expense of a fully landscaped outdoor pool. The Fastlane Pool can be set up in less than an hour, which means it can be used just for the season and then put away. Install the Fastlane Pool in your backyard, on your patio, even in your garage and get the finest quality swim all for less than \$10,000.

The Fastlane Pool was developed as an outgrowth of our Fastlane program – a series of swimming machines designed to fit in the backyard pool and create a swim current in conventional pools too short for a good swim (see page 12). We then selected the highest quality, Italian-made, fabric-walled pool to make the Fastlane Pool. The result appeals to people short on space but interested in swimming and fun without the expense of a conventional pool. In some cases our customers plan on installing a backyard pool in the future that will include a Fastlane, but for the moment the Fastlane Pool gets them swimming without the hassle of permitting, planning, and construction, not to mention the cost of building a regular pool.

IDEAL POOL®.be

This pool can be assembled in less than an hour without tools.

1 Assembly of the legs and the lower parts of the metal frame

2 Location of the liner

3 Assembly of the upper parts of the metal frame

4 Now the pool is ready!

Specifications:

- 10' x 14'6" footprint
- water capacity: 3,000 gallons
- water depth: 45"
- wall height: 49"
- powder-coated steel framework
- ladder
- rugged 60 mil reinforced membrane
- solar blanket
- circulating pump
- cartridge type filter
- 5 hp Fastlane swim current generator

Options:

- high performance 6 hp Fastlane
- 7" high-visibility LED swim pace display
- underwater stainless steel floor mirror
- electric, gas or propane heater
- retractable security cover
- wood steps

The FASTLANE POOL™
Wildflower Triathlon, Lake San
Antonio, CA

FASTLANE®

There's nothing quite like a backyard pool. If you want to swim, though, a backyard pool is just too short. Five strokes – wall – five strokes – wall – five strokes – wall... it gets old fast. Even a 40-foot pool is not long enough to get into a swimming rhythm.

That's where we come in. We built the Fastlane® for those who already have a pool – or those who cherish the look of a traditional freeform pool – but who still desire the fitness and health benefits of swimming.

We offer two models appropriate for virtually any backyard pool. The **Deck Mount Fastlane** caters to those retrofitting an existing pool, hanging over the wall like a pool ladder. While the **Wall Mount Fastlane** anchors directly to the pool wall at the waterline. All connections and hoses remain out of sight, beneath the pool deck.

With either model, you enjoy the highest quality swim current available: smooth, even, and completely adjustable in speed with a handy floating remote. Monitor your swim with our high-visibility digital display. Challenge yourself with a top speed equal to a 1:06 100-yard pace.

The Fastlane truly transforms your backyard pool from passive amusement to a center for lifelong health and entertainment. With the Fastlane, you can swim for miles at whatever pace you set. Imagine owning a clean, utterly private river only a few feet from your back door. For play, exercise, relaxation, and complete personal wellbeing, nothing outpaces the Fastlane.

Wall Mount Fastlane

Deck Mount Fastlane

Specifications

- construction: thermoformed acrylic
- water inlet: 6 sided, 6.3 square foot inlet grill
- water outlet: 21" x 16" shock resistant, hexagonal, ABS grill
- water-resistant, wireless, remote control
- 52 discrete programmable speeds
- maximum 66-second 100-yard pace (5 hp)
- Maximum 58-second 100-yard pace (optional 6 hp)
- 7" high-visibility LED swim pace display (optional)
- swim propulsion unit: hydraulically-powered, 16", low-turbulence propeller
- hydraulic power unit 5 or 6 hp electric powered system
- electric requirements: 208–240 volts, 60 Hz, 30 Amp GFCI service

WATERWELL™

Ideal for aquatic exercise and therapy, the WaterWell provides chest-deep water in a free-standing package that fits just about anywhere. Warm water is perfect for relieving pain and stiffness in muscles and joints. The natural buoyancy of water supports your body and eases mobility. Available in multiple sizes and depths, the WaterWell is an Endless Pool without the swim current. Simple to install, the WaterWell is completely self-contained and perfect for home or commercial use. All filtration, heating and sanitizing equipment fits beneath the skirting and plugs into a single 110 volt, 15 amp GFCI wall outlet.

Specifications:

- Water Exercise Area: 6' x 6' to 9' x 15' (1' increments)
- Water Depth: 3'3" Standard, Optional 3'9", 4'3", 6'6"
- Water Quality System (110 volt, 15 amp GFCI)
 - Skimmer
 - Electric heater/controller
 - Cartridge type filter
 - Nature2 copper/silver ionization system
- Digital Poolside Controls with LED display
- Interior Bench Seat
- Interior Steps

Options:

- Synthetic Coping System (9 3/4" x 1")
- Aluminum Coping System (8" x 2")
- Underwater Treadmill
- Retractable Security Cover
- Stainless Steel Grab Bars
- Insulated Skirting System
- Underwater Lights
- UV Water Purifier
- Exterior Stairs
- Hydrotherapy Jets

FIBERGLASS ENDLESS POOL™

A Fiberglass Endless Pool is ideal for commercial installations where underwater treadmills are often used and the most durable interior surface is required. Like the Endless Pool Swim Spa, the Fiberglass Endless Pool is a single shell vessel typically craned into position. Full depth stairs at the rear of the pool provide easy access so the pool can be installed in-ground or partially above-ground. Since the unit can be made freestanding with optional bracing, it can even be installed fully aboveground and a deck can be constructed around the pool to make it appear partially in-ground.

Because the Fiberglass Endless Pool is available with greater water depth, it is also popular with our residential customers interested in aquatic exercises requiring deeper water. Water depths are available from 4'6" to 5'6". At the rear of the pool, a bench is provided for seating. Optional hydrotherapy jets can be installed on the wall behind this bench. Accent tile around the perimeter is a popular option, as are underwater lights.

As with all Endless Pools, the swim/therapy current in our fiberglass models is smooth, even, and fully adjustable in speed. Optional high-performance models are fast enough to challenge even competitive swimmers while the standard swim current is perfect for water aerobics, fitness swimming, or relaxing after a stressful day. With the extra room in these pools, they're ideal for the kids too.

Specifications:

- 7'6" x 17' swimming area
- 4'6" water depth: 3,900 gallons
- overall height: 60"
- molded 3/8" reinforced fiberglass
- solar cover
- circulating pump
- cartridge type filter
- 5 hp swim current generator
- electric heater

Options:

- high performance 6 hp swim current generator
- 7" high-visibility LED swim pace display
- underwater stainless steel swim mirror
- waterline tile
- manual retractable security cover
- natural gas or propane heater
- 5' 0" water depth: 4,350 gallons
- 5' 6" water depth: 4,800 gallons
